Four beautiful
Climbing Roses—
red, white, pink,
yellow. All
4 for only. 80c

1885 - 1931

THOSE two dates span the life of our nursery business. No firm in Michigan growing and selling small fruit plants and ornamentals exclusively has been in the business for a longer period of time and no other firm, we believe, has so many old customers, many of whom have purchased plants from us regularly for the past ten, twenty, thirty and even thirty-five years. Confidence induced by fair dealing is the only reason why these friends send to us year after year for their plants.

Berry growers have made big money the past few years, they have come into their own, and we believe this condition will continue. This spring particularly is the time to set heavily for in many sections the extremely hot and dry summer not only ruined entire patches but the plant supply throughout the country is so short that the usual acreage will not be set. One thing you should do is to order early and set as large a patch as you can afford for the law of supply and demand guarantees you a handsome profit if you follow this advice.

Every person receiving this catalog should order some of our ornamental shrubs, roses, perennials and evergreens. We believe our prices are the lowest you have ever seen offered and better, stronger stock cannot be had anywhere.

Choice Gladiolus Bulbs FREE

No flower garden is complete without a liberal planting of gorgeous, free flowering, many colored Gladioli. As an edging for tall shrubs, foundation planting or a large garden of just Glads alone, no other flower is more effective or more beautiful. Our "Knight's Choice Gladiolus Mixture" has beautified thousands of homes and many of our customers write us that it is the very finest collection they have ever seen. And now we are giving more bulbs FREE with plant and shrubbery orders than ever before. This is your opportunity to have a beautiful Glad garden at no cost to you whatever. Just read below:

For every order, accompanied by cash, and reaching us on or before April 1st, we will include free bulbs from our "Choice Mixture" as follows:

For Each \$2.00 Order— 15 Bulbs Free.
For Each \$5.00 Order— 40 Bulbs Free.
For Each \$10.00 Order—100 Bulbs Free.

And remember these are all full flowering size bulbs ready to give you a riot of beauty this very summer.

See page 20 for description and price of named varieties.

Price of Knight's Choice Glad Mixture: 12 bulbs, 35c; 25 for 60c; 50 for \$1.00; 100 for \$1.75.

Why Order Plants ? From Knight ?

OUR SPECIAL METHODS OF PROPAGATING AND GROWING INSURE BIG CROPS OF BIG BERRIES. The plants which we use in setting our new patches are all selected with the greatest care. In other words, they are **"the cream of the cream,"** proven out by years of consecutive growing. So careful is our inspection that no weak or imperfect plants are permitted to be the mother plants of the stock we send you. We set out our strawberry patches in the spring. The plants make their growth of runners and new plants during the fast growing season of summer and early fall. The following spring we **dig up the whole row.** The mother plant and the smaller and weaker young plants are all thrown away, thus only the best selected stock is sent out to the trade. You, therefore, not only receive selected stock; but the plants are produced from mother plants that have never borne fruit.

DAVID KNIGHT, Michigan's Pioneer Grower of Small Fruit Plants.

FRESHLY DUG AND CAREFULLY PACKED. We could fill several pages quoting enthusiastic letters from customers in nearly every state in the Union, complimenting us upon efficient packing, and the safe arrival of our shipments. These letters did not just happen. In fact, nowhere is the result of our years of experience more evident than in our careful methods of digging and packing.

KNIGHT'S "PURE-BRED" PLANTS are so carefully dug, that the entire root systems are preserved. Wire bound crates of different sizes, baskets and packages take care of strawberry plants, and smaller orders of cane plants. Large orders of cane plants are packed in strong boxes and barrels. Sphagnum moss, secured in carload lots in Wisconsin, is the packing material. Through long experience we have learned how damp this moss must be and just how to pack for different distances. Accordingly, wherever our customers live, the plants will reach even the most remote destinations in perfect condition.

This is of the utmost importance to you. Whoever you patronize should have this knowledge, gained only by long experience, and many failures with berries can be traced to a lack of careful packing. Often improperly packed plants fail to produce, even when they still retain sufficient vitality to live.

YOU CAN REST ASSURED THAT YOUR SHIPMENT OF KNIGHT'S "PURE-BREDS" WILL COME TO HAND IN PERFECT GROWING AND PRODUCING SHAPE.

A. R. KNIGHT, Gen. Mgr.

Mastodon

The One Successful Everbearer

Many varieties of Everbearing Strawberries, both before and after Mastodon was introduced, have been grown and offered for sale. Some of them have their good points and we are now experimenting with two that are promising; however, up to the present time, Mastodon is so far superior to all other sorts that we are selling this one variety only and will continue this policy until a variety as good or better is produced.

Everyone interested in Strawberries has heard and read so much about Mastodon that a description of it is a repetition of what you already know; however, it will bear repeating that Mastodon is a real Everbearing success. It does produce enormous size berries of excellent quality three months after setting in spring and it does continue to bear all summer and fall with a second crop the following spring, but it has been our experience that it is more profitable to set a Mastodon patch every spring and harvest two crops than to carry the patch over for the second fall crop.

To make the most from Mastodon berries we urge you to grow a patch with mulch paper this year. Try setting them close together

—only about six inches apart—and keep all runners removed. The plants will stool up heavily and a large fruiting surface will be formed. The mulch paper will keep them free from weeds, adequate moisture will be assured at all times and the crop of fruit produced will be a surprise and pleasure to you, not only as to quantity but also as to increased size and superior quality.

Despite the dry summer of 1930, we have a fairly good supply of Mastodon plants and the root growth they made is splendid. Our plants are true strain Mastodon selected with great care; our price is the lowest at which we have ever sold this variety, and, although we have several hundred thousand plants, we know from past seasons' experience they will not be sufficient to meet the demand, and for that reason we urge an early placement of orders. Prices on page 23.

Premier (Howard No. 17) (Per.)

We have discarded all other early varieties because Premier is so superior to them, not only here but in every other section of the country where Strawberries are grown. Some of the outstanding characteristics of Premier are: Handsome, glossy rich red color; size large to very large and beautifully uniform and symmetrical in shape; quality delicious, unsurpassed by any other variety. Very firm, making it an excellent shipping berry. Immensely productive. No variety will yield more fruit to the acre, as it ripens early and continues through a long season. As frost-resistant as a berry can be. Makes a good growth of strong, healthy plants which produce good crops when less sturdy sorts fail. Should have good soil and care but will do well on any soil in any climate. We had the opportunity to be on several of the large markets when berries were being brought in and sold last season and there was scarcely a day that Premier did not bring a premium of from 50c to \$1.00 per crate over most other varieties. Premier and Howard No. 17 are very similar if not identical, although the variety was first introduced under the latter name. You can order either Premier or Howard No. 17 with the assurance that you will receive the best early Strawberry ever known.

Never has there been enough Premier plants to supply the demand. The same conditions are true this year and the only safe plan is to order early. Prices on page 23.

Premier.

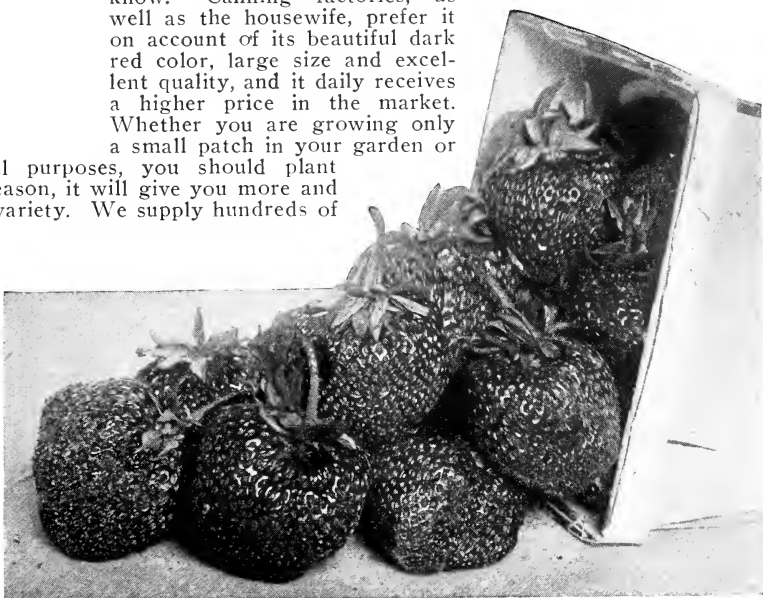

Knight's Wonderful Midseason Gibson (Per.)

Has Made More Money for Fruit Growers Than Any Other Variety Ever Grown.

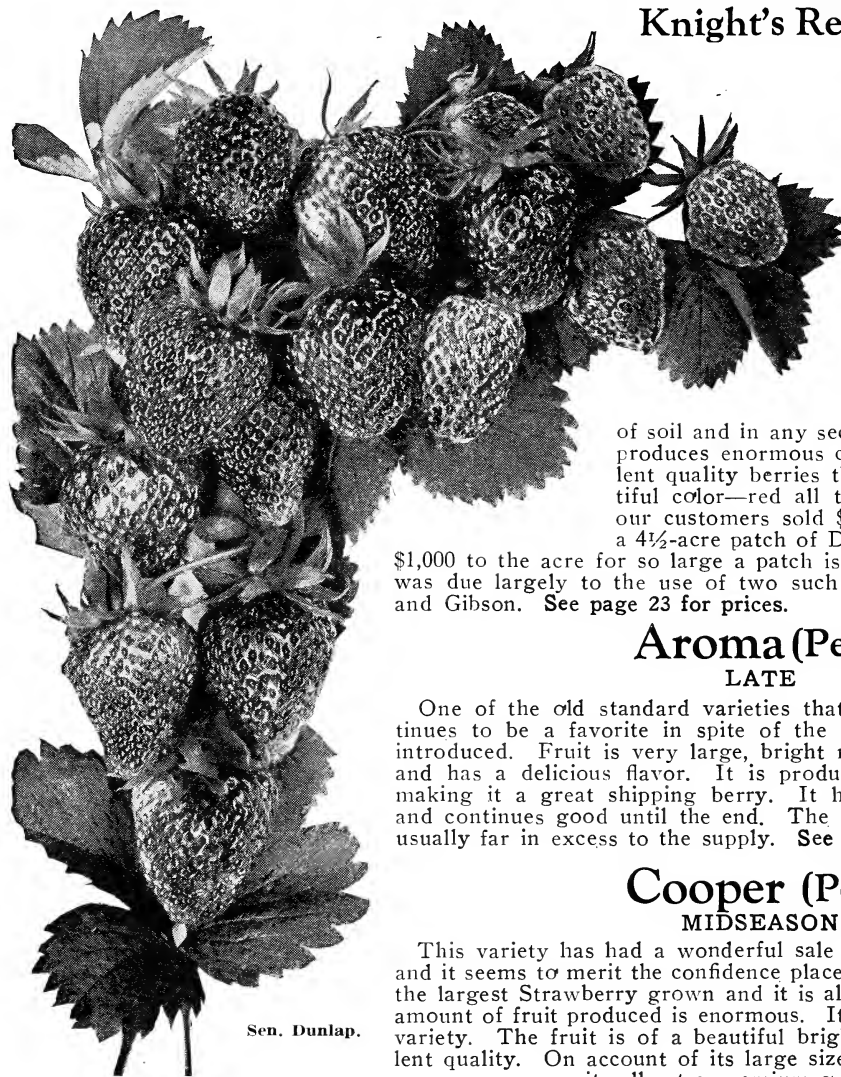

No better midseason Strawberry has ever been grown than Gibson. It was our privilege to introduce this variety about fifteen years ago and we have always considered it one of our greatest achievements. Gibson will grow and produce wonderful fruit over a wider area of country and more diversified soil and weather conditions than any other Strawberry we know. Canning factories, as well as the housewife, prefer it on account of its beautiful dark red color, large size and excellent quality, and it daily receives a higher price in the market. Whether you are growing only a small patch in your garden or

several acres for commercial purposes, you should plant heavily of Gibson for, in its season, it will give you more and better berries than any other variety. We supply hundreds of thousands of Gibson plants to our customers every season and the fact that they are so largely and widely grown is proof of their value. We have a large and excellent supply of Gibson plants this season, carefully grown, healthy, true to name and priced right. Let us have your order. Price on page 23.

Gibson.

Sen. Dunlap.

Knight's Reliable Midseason Dunlap (Per.)

**"KING OF THE
CANNERS"**

For more than twenty-five years Senator Dunlap has been a big money maker for commercial Strawberry growers. It makes plants freely, assuring an ample fruiting bed; it does well on any type

of soil and in any section of the country and it produces enormous crops of good sized, excellent quality berries that are a dark, rich, beautiful color—red all the way through. One of our customers sold \$4,230 worth of fruit from a 4½-acre patch of Dunlap and Gibson. Nearly \$1,000 to the acre for so large a patch is a wonderful showing and was due largely to the use of two such good varieties as Dunlap and Gibson. See page 23 for prices.

Aroma (Per.) LATE

One of the old standard varieties that, in certain sections, continues to be a favorite in spite of the many new varieties being introduced. Fruit is very large, bright red in color to the center, and has a delicious flavor. It is productive and firm of texture, making it a great shipping berry. It has a long fruiting season and continues good until the end. The demand for this variety is usually far in excess to the supply. See page 23 for prices.

Cooper (Per.) MIDSEASON

This variety has had a wonderful sale during the past few years and it seems to merit the confidence placed in it. Cooper is probably the largest Strawberry grown and it is also a heavy cropper, so the amount of fruit produced is enormous. It is a midseason, staminate variety. The fruit is of a beautiful bright red color and of excellent quality. On account of its large size and beautiful appearance it sells at a premium over most other sorts and is especially recommended for supplying home markets. Prices on page 23.

Dr. Burrill (Per.) MIDSEASON

It is claimed that Dr. Burrill is an improved Dunlap. We can find very little, if any, difference between them. But it is surely a wonderful producer of good size, handsome color and fine quality berries, and is very profitable to grow on account of the immense crops produced. For home use, home market or distant shipping it will give good service and we recommend planting freely of it. See page 23 for prices.

Pearl (Per.)

A wonderful late variety that is needed by every Strawberry grower. It is the latest June berry and its large fancy fruit always demands a good price in market as other varieties are then nearly gone. Plants of Pearl are strong and healthy, producing enormous dark red berries of the very finest quality. Prices on page 23.

Red Gold (Per.)

A new early variety of proven worth. Introduced by the Gardner Nursery Co. a few years ago, it has been widely grown and has come into public favor rapidly. It is one of the largest berries grown, is a bright shiny red in color and surprisingly sweet and delicious. Red Gold makes new plants readily, the plants having enormous root systems, enabling them to withstand severe droughts. The fruit stems are exceptionally large and carry an average of twice as many berries as ordinary varieties. Red Gold should be included in every order and to make this possible we have made the price very reasonable this season. Prices on page 23.

Blakemore (Per.)

Few varieties of strawberries have been offered to the public with such strong endorsement from agricultural stations and private growers as Blakemore. It is of scientific origin, being a cross of Missionary and Premier and in the various tests made has been given first place by U. S. Plant Stations and also by the National Preservers Association. In shape and color it much resembles its parent, Premier, but it is somewhat earlier than that variety. It makes new plants much more freely and it is a heavy producer of fancy highly colored fruit, like Premier. Its beautiful bright red color, tough skin, firm flesh and excellent flavor makes it very desirable for preserving and it will stand longer after picking and reach market in better condition than any other sort. We have only a limited number of Blakemore plants this season and in order to give it as wide a distribution as possible we are limiting each order to 100 plants. Prices on page 23.

Blakemore Strawberries.

Beauty (Per.)

This is a late berry that has only praise wherever grown. The leaves are larger, fruit stems longer and entire plant stronger than most any other variety. The fruit is produced in immense quantities and it is large, beautifully formed and of the best quality. Get a supply of our pure Beauty plants this spring if you want a late berry of exceptional merit. See page 23 for prices.

GATOR HIDE MULCH PAPER

Mulch paper for the better growing of small fruits, tree fruits, ornamentals and garden crops is now a proven success. Mulch Paper does increase the soil temperatures, thus releasing vital plant foods and inducing quicker, stronger growth. Mulch Paper does conserve moisture and insures all crops against drought. Mulch Paper does do away with weeds. These three things—the most important entering into the growth of plant life—have been proven beyond the shadow of a doubt. Any crop grown through Mulch Paper will not only be increased greatly in quantity but the size will be larger, the quality better and you can go to market with your crop from a

week to ten days sooner than your neighbor who has unmulched fields. Set a patch of strawberries, raspberries or blackberries through Mulch Paper this year, put a 3' x 3' square around trees you are planting or those that have been in the ground for several years, use it in your garden planting, around your ornamental shrubs, roses, perennials or evergreens and you will have some miracles to show your friends before many months have passed.

See the Difference in Strawberry Plant Growth With and Without Mulch Paper.

For sizes and prices see inside back cover.

Knight's "Pure Bred" Black Raspberries

Black Pearl.

Black Raspberries should be set from 3 to 3½ feet in the row and the rows 7 feet apart. As soon as growth starts and plants are from 18 to 20 inches high, pinch out the top of each cane, which causes them to send out laterals and gives a larger fruiting surface for the next year.

Red Raspberries should be set 2 feet in the row, and the rows 6 to 8 feet apart. Do not pinch off the tips of these, but the rapid growing kinds, such as Cuthbert, should be cut back somewhat in the spring.

After the fruiting season of both reds and blacks, cut out the old wood, thus allowing the new stalks to make a good growth for the coming season. **See prices on page 9.**

Black Pearl

The Best Early Blackcap.

Year after year this wonderful early blackcap maintains its superior value and grows in public esteem. Although originated in Western Missouri, where it is grown more widely and more profitably than any other sort, it has now been thoroughly tested in every section where Raspberries are grown and always with wonderful success. Black Pearl ripens from a week to ten days earlier than Cumberland and when planted with that grand old variety will give you a length of season and quality and size of fruit that cannot be produced in any other way. It is deeper rooted than any other blackcap

and for that reason is the best drought resister, often ripening a good crop of fruit when the berries of other varieties dry up on the vines. Our supply of Black Pearl is not large this year but the quality is excellent and we urge you to order freely as we know you will be more than pleased when fruiting time comes. **See prices on page 9.**

Cumberland The Old Standby—None Better

No Black Raspberry is grown as extensively and none has made as much money for fruit growers as Cumberland. Wherever blackcaps can be grown, Cumberland is grown, and with wonderful success in all sections. Cumberland plants are healthy, vigorous growers, throwing up stout, stocky, well branched canes that produce immense crops of magnificent berries—large, a rich black in color, firm and of the highest quality. They ripen their fruit in midseason

and continue in bearing for two or three weeks. Cumberland is less susceptible to disease than most varieties and if planted on well drained land and properly cultivated, hoed and pruned, a patch once established, will produce profitable crops for several years.

Our Cumberland, as well as all other Raspberries, are inspected twice each year by the State Department of Agriculture and you can depend upon it that our stock is healthy, vigorous and true to name. If you will take our advice and set a good sized acreage of Black Pearl and Cumberland you will have a patch that will be a surprise to your neighbors and a pleasure and profit to yourself. **See prices on page 9.**

The CUMBERLAND Black Raspberry, largest of our standard Blackcaps, and a sure moneymaker.

Red Raspberries

Latham Red Raspberries.

Latham

A Wonderful Success Wherever Planted.

Every Agricultural College and every fruit grower testing Latham has reported very favorably as to the large size and excellent quality of its fruit; its entire resistance to frost during the coldest winters and the enormous quantities of fruit it will produce. The Connecticut Agricultural College have a record of 5,430 quarts per acre from a three-year-old patch.

Latham ripens its fruit at same time as Cuthbert or a week to ten days later than King. It is large, handsome and delicious from beginning—an excellent shipping variety—and last summer sold for as much as \$1.00 per crate more than other varieties. Our supply of Latham plants is limited this spring, but is of unexcelled quality, being positively pure and disease free.

CHIEF—The New Red Raspberry

Here is a wonderful Red Raspberry that is forging ahead as fast as did its illustrious ancestor, Latham, and it has just as important a place to fill for it is ten days earlier than Latham, ripening at a time when Red Raspberries bring the most on all markets. Chief was originated at Minnesota State Fruit Breeding Farm and is a selection from 4000 seedlings of Latham. It is immensely productive, even surpassing Latham in that respect, the berries are of good size and excellent quality and the bushes are absolutely hardy and resistant to disease. We consider Chief the most outstanding Red Raspberry that has been produced in years and believe these two, Chief and Latham, will make more money for fruit growers than any other two they can grow, combining, as they do, a long fruiting season, extra heavy yield and fruit of such size, color and quality as to command top prices at all times. Our supply of Chief is quite limited.

King

This variety has been our principal early market berry for a number of years and in many sections it is more extensively grown than any other sort. It ripens early, coming with the last of strawberries, about July 1st. The berries are of fairly good size, the quality is good and it is an immense cropper. King is not particular as to soil or location, seeming to thrive equally well in light or heavy ground. It is a thoroughly dependable variety.

KNIGHT'S RASPBERRY PRICES

| | 25 | 50 | 100 | 1000 |
|---------------------------|--------|--------|--------|---------|
| Cumberland | \$0.75 | \$1.25 | \$2.00 | \$15.00 |

Quantities up to 500 take 100 rate, over 500 take 1000 rate. See page 22 for postage rate.

The KING Red Raspberry Ripens Early.

Knight's "Pure Bred" Blackberries

Eldorado Blackberries.

In planting your Blackberry patch, select land that is full of humus and retains moisture well, for this crop ripens at a time when we can naturally expect dry weather, and if your patch is on land that quickly dries out, the crop will suffer. Culture for Blackberries is the same as raspberries, only they need more room and should be set 3 to 4 feet apart in the row and the rows from 7 to 8 feet apart.

Eldorado Blackberries

PROFITABLE—PRODUCTIVE—HARDY

We have grown practically all varieties of blackberries, but Eldorado is so much superior to all others that we now grow and sell only that one variety. Eldorado is unusually hardy. We have never known it to winter-kill or fail to produce an exceptionally fine crop of fruit. Even in the far Northwest it is grown without winter protection. The berries are very large, jet black and of excellent quality. They are borne in large clusters and ripen well together. In a word, Eldorado is the greatest Blackberry in cultivation and we can assure you that you will not be disappointed in it. Our plants are strong and heavily rooted.

| PRICE | | | |
|--------|--------|--------|---------|
| 25 | 50 | 100 | 1000 |
| \$1.00 | \$1.50 | \$2.50 | \$16.00 |

Dewberries

We strongly recommend the growing of Dewberries for they come after raspberries are gone and before blackberries commence—when the market is bare of berries and prices are high. Dewberries thrive in any soil, even light land that will not grow other berries successfully. Get started with a patch of Dewberries this season and you will find it one of the most profitable parts of your farm.

Lucretia Dewberry

Acknowledged by all fruit growers and horticulturists to be the finest Dewberry grown. Lucretia commences to ripen from a week to ten days earlier than blackberries. The fruit is very large, of a shiny black color and deliciously sweet and luscious. Don't be without this wonderful berry. Our superior, heavily rooted plants cost no more than ordinary ones. Get your order placed early for our supply is limited.

| PRICE | | | |

| \$1.00 | \$1.50 | \$2.50 | \$16.00 |

For postage rate, see page 22.

Lucretia Dewberry.

Knight's "Pure Bred" Grapes

Any good dry soil with sufficient drainage is suitable for growing Grapes, if the exposure and the climate are favorable. Before planting, plow, harrow, and pulverize thoroughly down to a depth of 12 to 18 inches. Plant in rows 8 to 10 feet apart and the plants 10 to 12 feet in the rows. There are so many methods of pruning, different methods being adapted to different localities, that we will not dwell on that point, only to say that proper pruning is very essential to the successful growing of Grapes, and the method that is proving best in your locality is the one for you to follow.

We have a good supply of fine plants, but not enough to last through the season. Avoid disappointment and money loss by ordering today.

Concord

Decidedly the most popular Grape in America, and deservedly so. Bunch large, compact; berries large, covered with rich bloom; skin tender, but sufficiently firm to carry to distant markets; flesh juicy, sweet, pulpy, tender; vine strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety grown.

Niagara

Occupies the same position among the white varieties as Concord among the black, the leading profitable market sort. Bunch and berries greenish white, changing to pale yellow when fully ripe. Skin thin but tough, quality much like Concord. Niagara will thrive and produce big crops almost anywhere. It does well in Michigan and south to the most southern states.

Concord
Grape.

Moore's Early

This is the most popular early market Grape grown. It ripens ten days before Concord and always brings a good price. The fruit is larger than either Concord or Niagara. It has a beautiful dark blue color and the quality is excellent. We are glad to recommend Moore's Early very highly as we know it will please you.

| | PRICE | | | | | |
|------------------------------------|--------|--------|--------|--------|--------|---------|
| | Each | 12 | 25 | 50 | 100 | 1000 |
| Concord, 2 yr., strong | \$0.15 | \$1.00 | \$1.65 | \$2.80 | \$4.50 | \$30.00 |

| Moore's Early, 2 yr., strong | .15 | 1.50 | 2.70 | 5.00 | 8.00 | 50.00 |

Knight's "Pure-Bred" Asparagus

Washington

The Department of Agriculture at Washington introduced this variety several years ago and it is now more widely grown than any other sort. The stalks are of a purplish green color, tender, large and of excellent flavor, but the thing that recommends it the most is its resistance to rust—a disease that has been a menace to Asparagus patches of other varieties. With proper care you can depend upon a patch of Washington Asparagus giving you an abundant supply of this most delicious of all spring vegetables for years to come.

| PRICE | 25 | 50 | 100 | 1000 |
|-------|--------|--------|--------|---------|
| | \$0.75 | \$1.00 | \$1.50 | \$10.00 |

Palmetto

Palmetto is the old standby that for years has been grown so profitably by gardeners who make a business of producing Asparagus for market. It is early, large, very productive, and has a flavor unsurpassed. You make no mistake in setting either Washington or Palmetto.

| PRICE | 25 | 50 | 100 | 1000 |
|-------|--------|--------|--------|--------|
| | \$0.50 | \$0.75 | \$1.20 | \$8.00 |

Washington Asparagus.

Knight's Choice Flowering Shrubs

At a Price You Can Afford to Pay

The last finishing touch to landscape planting—what wonderful effects can be had with these graceful, glowing shrubs—and at a cost everyone can afford. We believe you have never had the opportunity of buying them at so low a price before, and the stock is excellent, heavily rooted, sure to grow. Knight's enviable reputation of 45 years is behind each plant.

Althea - Rose of Sharon

This is one of the most valuable of all shrubs for it gives its profusion of large, highly colored flowers late in August—just the blooming season of most flowering shrubs. The flowers much resemble the tender hibiscus in form and are the color spots of fall just as the spiraea and weigela are of spring. The bushes are ornamental in shape and grow to a height of 8 to 10 feet, covering themselves in fall with beautiful double white, purple, red, rose and striped flowers.

Althea—Rose of Sharon.

Butterfly Bush - Summer Lilac

This bush grows from 4 to 6 feet in height and produces its beautiful lilac colored blooms from the tips of every particle of new growth. It flowers from July to September, but more profusely during August and at that time the mass of conspicuous purple and violet flowers attracts many butterflies, adding much to its attraction.

Deutzia

Gracilis. A dwarf shrub growing from 20 to 30 inches in height. Its graceful drooping branches are wreathed with pure white flowers in May. When used for borders it is most valuable and beautiful.

Pride of Rochester. This is the most hardy and popular of the Deutzia family. It grows from 6 to 8 feet in height and its mass of pinkish white bloom in June is a joy to all beholding it. It adapts itself to any type of soil or growing conditions and for specimen or mass planting it is indispensable.

Forsythia—Golden Bell.

Forsythia - Golden Bell

These attractive old shrubs, growing 6 to 8 feet tall, light up the garden with glowing masses of golden yellow before any other bloom appears in the spring. In fact, the flowers appear before the leaves and enliven a landscape that is otherwise leafless and bloomless.

Bush Honeysuckle

Tatarica rubra. For a tall hedge to screen an unsightly view there is no shrub so valuable, as it will grow from 10 to 12 feet high in a few years. Besides it is a beautiful thing both summer and winter as it is the first shrub to clothe itself with leaves in spring. Its light crimson flowers and luxuriant foliage are a delight in summer and the thousands of bright red berries give a charming touch of color to the winter landscape.

Butterfly Bush.

Hydrangea Arborescens

(Hills of Snow)

The flowers of this shrub are much like those of the snowball in appearance. They are conspicuously white and enlivening during July, August and September. By keeping the crowns cut back each spring it makes a symmetrical dense hedge of from 3 to 5 feet in height. The plants are perfectly hardy and free from diseases.

Hydrangea P. G.

Hydrangea P. G.

Everyone knows and loves this hardy old-fashioned shrub. The large spikes of greenish white blossoms first appear in August and last until autumn but as time goes on they change to pure white, then to a pinkish tinge and last to a rich bronze. No grounds are complete without a liberal planting of this grand old shrub.

Persian Lilac

This has become the most popular Lilac grown. The large trusses of deep purple flowers are borne in profusion and their sweet fragrance carries over the entire grounds.

Persian Lilac.

Philadelphus - Mock Orange

One of the tallest shrubs grown and excellent for hedges as well as for individual planting. It flowers very profusely, much resembling strawberry blossoms, but larger and its waxy white, fragrant bloom is a delight to all. Don't fail to plant at least a few Mock Orange.

Snowberry

This shrub has small pinkish flowers in June and July, followed by large clusters of milk-white berries that remain on the bushes far into the winter. The growth of this shrub is graceful and attractive and the combination of pink flowers and white berries on the same twig is charming.

Snowball

The popular old-fashioned Snowball is so well known that it needs no description. No planting is complete without it. You should have at least two or three of these beautiful shrubs in your yard or garden.

Snowberry.

SEE PRICE LIST ON PAGE 23

Deutzia, Pride of Rochester.

Spirea Van Houttei.

FLOWERING SHRUBS—Continued.

Spirea Van Houttei

What would spring be without this most popular of all flowering shrubs, Bridal Wreath, as it is sometimes called. A mantle of beautiful white spreads over the entire country when Spirea Van Houttei puts forth its bloom in May and June. It can be used with striking effect in both individual and mass planting and if you are ever in doubt what to use for a certain location, then plant Bridal Wreath and you are sure to be right. Note —For hospitals, public grounds or private planting where a large quantity of Spirea is needed and price is an object, use the 18 to 24 inch grade for they are sturdy, well rooted plants and in a few years will be as large as the more expensive grades. You cannot equal our low prices anywhere and the quality of all of our shrubs is unsurpassed.

Spirea Anthony Waterer

A compact, dwarf shrub with dense deep green foliage. On account of its graceful low growing habits it is very valuable for foundation planting and edging in front of taller shrubbery. The flowers are a showy red borne in full flat clusters on erect stems.

Sumac, Cut Leaf

The foliage of Sumac is very fine cut and fernlike, giving it a tropical appearance. White flowers appear in July followed by red fruit. In fall the foliage is a brilliant red and adds greatly to any landscape planting.

Tamarix

A beautiful tall growing shrub with delicate feathery foliage like the Juniper. Tiny pink flowers appear in April and last for weeks. The bush has a spreading habit but can be kept in any desirable shape by pruning.

Weigela Rosea.

Spirea Anthony Waterer.

Viburnum - High Bush Cranberry

Has handsome, dense, brilliant green foliage and in spring produces beautiful large snow-white flowers in profusion. Autumn finds the bushes strikingly beautiful with their mass of crimson berries and richly colored foliage.

Weigela Eva Rathke

Similar in appearance to Weigela rosea but somewhat smaller in growth. It attracts much attention at blooming time for its profusion of brilliant carmine-red flowers with white throats.

Weigela Rosea

The most popular Weigela grown. It will attain a height of from 5 to 6 feet and its long, graceful arching branches, literally covered with delicate pink, bell-shaped blossoms during June, is a sight that cannot be forgotten. There is also a scattering of bloom all during the summer. The leaves are large and beautiful, free from disease and themselves add a charm to the landscape.

See price list, page 23.

Hardy Ornamental Vines

Boston Ivy A self-clinging vine which is valuable for completely covering any object to which it attaches itself. The foliage is a beautiful deep green turning to many attractive shades of red and bronze in the fall. Price, each, 25c; 5 for \$1.00; 10 for \$2.00.

Boston Ivy.

Bittersweet This is a native vine, unusually valuable and attractive for its handsome glossy foliage and beautiful orange-crimson berries retained all during the winter. Price, each, 35c; 5 for \$1.60; 10 for \$3.00.

Hall's Japan Honey-suckle An evergreen twining vine that is extensively used to cover trellises and fences. Its bloom is an intermingling of white and yellow with a charming fragrance. Price, each, 15c; 5 for 65c; 10 for \$1.20.

Wisteria One of the most handsome vines for use on trellises, porches and pergolas. It is a vigorous grower, the foliage is attractive and the flowers borne in dense drooping clusters are of matchless beauty. Price, each, 20c; 5 for \$1.10; 10 for \$1.60.

Purple Wisteria.

Clematis Jackmani

Probably the most popular of the Japanese Clematis. Its flowers are violet-purple and from 4 to 6 inches in diameter. Very attractive. Price, each, 60c; 5 for \$2.75; 10 for \$5.00.

Barberry Thunbergi.

Clematis Paniculata Flowers of this are white and rather small but very fragrant and produced in the greatest profusion. One of the most desirable and hardy garden vines. Price, each, 25c; 5 for \$1.10; 10 for \$2.00.

Hedge Plants

Barberry Thunbergi No shrub in existence is so generally planted and has so many practical purposes as Japanese Barberry. It hasn't one serious fault and can be grown in semi-shady, moist, dry or sunny locations. When grown as specimen plants or as an edging to taller shrubs its graceful arching branches covered with the most luxuriant deep green foliage in summer and beautiful bright red berries all winter are the most attractive sight imaginable.

New Red Leaved Barberry Never has a new shrub attracted the universal attention as this Red-Leaved Japanese Barberry. It is nearly identical to the green-leaved Barberry Thunbergi with the exception that its foliage is a rich lustrous bronze-red, changing in the fall to vivid orange-scarlet and red. Its only requirement is plenty of sunshine.

Amoor River Privet This Privet has all of the good qualities of California Privet but, in addition, is perfectly hardy and is the one that should be used wherever severe winter temperatures are experienced. It is used mostly as a clipped hedge but is also valuable for semi-screening and mass planting, as it is graceful in its growth and its rich dark green leaves stay on the branches longer than any other shrub.

Amoor River Privet.

Beautiful Hardy Bush Roses

American Beauty.

cially valuable for cut flowers. Deep pink, nearly crimson, large and very fragrant.

Frau Karl Druschki (White American Beauty). Lovely in bud and full bloom. Gorgeous, large, waxy white flowers in June with a final burst of bloom in the midst of the first snow.

General Jacqueminot. A universal favorite. The perfectly formed, fragrant blossoms come early and are borne on long, graceful stems. In color a rich scarlet-crimson. Beautiful.

Gruss an Teplitz. The value of this Rose is its intense richness of color—a velvety crimson-red. It makes small plants but blooms profusely all summer.

Paul Neyron.

Frau Karl Druschki.

Ophelia. One of the most beautiful and popular Roses grown, the flowers are produced lavishly and are distinctive in their form. It is white tinted with yellow, rose and salmon.

Paul Neyron. The largest variety in cultivation and grown by all Rose lovers. It blooms from June until November and is particularly good during autumn. The bloom is produced on long, smooth, thornless stems and is a clear rose-pink. Sometimes call "Pink American Beauty."

Pink Radiance. A gorgeous clear salmon-pink Rose of glowing loveliness. The bloom is very large and abundant, borne on long, strong stems. One of the finest of all Roses.

Price, each, 30c; 3 for 80c;
10 for \$2.40.

Compare the prices of these sturdy, heavily rooted, two-year Roses and notice how much money you can save by sending us your order.

Roses and ornamental shrubs set with a three-foot square of mulch paper will make more rapid growth and produce bloom more abundantly than if grown in any other way—besides having no tedious work of spading and hoeing.

General Jacqueminot.

Lady Hillingdon. An exquisite Hybrid Tea Rose with long pointed buds that open into gorgeous double blossoms. An entrancing deep apricot-yellow, the pride of every Rose grower.

Los Angeles. Flowers are large, beautiful in shape and continuous in bloom. It is a flame-pink toned with coral and shaded with gold at the base of petals. A gorgeous, outstanding Rose.

Gruss an Teplitz.

Los Angeles.

HARDY BUSH ROSES—Continued.

Red Radiance. A duplicate of Pink Radiance in everything except color, this being a lovely brilliant crimson. Both Radiance Roses are valuable for cut flowers and should be planted freely.

Red Radiance.

Sunburst. This exquisite new glowing orange-rose slightly paling at edges of petals to resemble a true sunburst has captured the love of all Rose growers. It is one of the very best of the Hybrid Teas, blooms freely and is excellent for cut flowers. Sunburst has always sold for a high price, never less than \$1.00 each, until our present price this spring.

Sunburst.

Hardy Climbing Roses

Price, each, 30c; 3 for 80c; 10 for \$2.40.

Climbing American Beauty. This is the true American Beauty Rose, having the same lovely, fragrant, deep pink bloom, with the one exception that it has a strong climbing habit of growth. The abundant blossoms are at their best before the bush Roses commence and their loveliness is not excelled even by those grown in hot houses.

Crimson Rambler. This grand old rambler is a favorite everywhere on account of its brilliant color and sturdy habit of growth. Can be used as a climber or in bush form, and in either case its large clusters of beautiful crimson flowers cover the branches their entire length.

Dorothy Perkins. A beautiful shell-pink climbing Rose, the showiest and hardiest of the pink climbers. It has the same sturdy habits of Crimson Rambler and its flowers are borne in great clusters of from thirty to forty and sometimes more.

Dorothy Perkins, White. The same as Dorothy Perkins with exception that the flowers are white. Borne in immense clusters the same as pink Dorothy Perkins.

Dr. Van Fleet. A new and desirable type of climber, with flowers as large as Tea Roses and admirable for cutting, the stems being from 12 to 18 inches long. The color is a delicate flesh-white, very attractive at blooming time.

Excelsa. This Rose is known as Red Dorothy Perkins. Its radiant blood-red clusters fairly cover the thrifty vines in early summer.

Gardenia. In early summer the Gardenia vines are literally covered with innumerable small, yellow buds which gradually open to beautiful creamy white flowers scented with jasmine.

Paul's Scarlet. This has been a decided sensation ever since its introduction several years ago. Many claim it to be the best climber grown. Its bloom, which is borne in large clusters, is a vivid scarlet which it retains until the petals fall.

The individual flowers are larger than most climbers. Don't fail to plant some Paul's Scarlet this spring.

Paul's Scarlet.

Climbing American Beauty.

Effective Evergreen Planting.

Hovey's Golden Arbor-Vitae. A small, hardy tree, very compact and elliptical in shape. The foliage is light green with a tinge of gold that is alluring and very distinctive. Each, \$1.00; 3 for \$2.50.

Irish Juniper. This charming tree immediately attracts attention on account of its glaucous sage green color and slender, erect formal habit of growth. It has a decided advantage over anything else you can use for formal effect in contrast with other trees. Each, \$1.25; 3 for \$3.25.

Pfitzer Juniper (J. Pfitzeriana). One of the newer evergreens but acknowledged as the most popular of the spreading type. It has a peculiar, graceful, spreading growth all its own. Flowing lines are especially valuable in landscape work and this Juniper seems to meet this requirement better than any other; however, it will stand severe pruning if it outgrows its location. Foliage is a beautiful green with blue-gray tinge. Each, \$2.00; 3 for \$5.50.

Mugho Pine. This is an excellent dwarf Pine—globe-shaped, with erect branches. The foliage is dark green and is especially beautiful in spring when the new growth appears. Each, \$2.00; 3 for \$5.50.

White Pine. Perhaps the best of the pine family on account of its rapid growth which attains great height with age. It has beautiful silvery light green foliage in long swaying clumps of soft needles. Each, \$1.25; 3 for \$3.25.

Scotch Pine. Where quick effect is wanted this is the pine to use as it has the ability to establish itself quickly and grow rapidly. Its foliage is a dark green, very effective when grown with Norway Spruce. Each, \$1.25; 3 for \$3.25.

Norway Spruce. This has long been the most popular Spruce, as it grows to a lofty noble tree and its foliage and manner of growth is, indeed, beautiful. It can be used equally well for specimen planting or in groups where contrast is desired. Each, \$1.00; 3 for \$2.50.

Colorado Blue Spruce. One of the showiest and most impressive evergreens on account of its sharply defined pyramidal form and the entrancing silvery blue luster of its foliage. No more ornamental tree can be grown and it thrives in nearly all climates and soils. Each, \$5.00; 3 for \$12.50.

Evergreen Trees

"ARISTOCRATS"

There is nothing more desirable for landscape work than evergreen trees. Their cost has been a little prohibitive in the past and you will undoubtedly be surprised to learn our low prices. Everyone can now afford to have these "aristocrats" and you can depend upon it that Knight's evergreens are just the best that can be had, every one with a strong root system and top growth, balled and burlapped so as to reach you in prime condition and sure to grow.

American Arbor-Vitae. A rapid growing, beautiful evergreen with a soft bright green foliage from the ground up. Is

Pyramidal Arbor-Vitae.

used for specimen planting but very valuable for hedge work as it stands shearing better than any other evergreen. Each, 75c; 3 for 2.00.

Pyramidal Arbor-Vitae. This is a strikingly attractive tree as it is perfectly pyramidal in shape and the most compact and erect of the entire species. Foliage is a beautiful deep green and it retains its color throughout the entire year. Each, \$1.25; 3 for \$3.25.

Globe Arbor-Vitae (T. Globosa). Usually called Globe Evergreen, as its shape is absolutely round or globular. The tree, when fully grown, is not more than four feet high and, with its handsome shade of dark green, gives a distinction to any spot where it may be planted. Each, \$1.00; 3 for \$2.50.

Globe Arbor-Vitae.

Norway Spruce.

Hardy Perennials

Beautiful flowers of every conceivable color can be had every week of the growing season with hardy perennials. Just set them out and every spring they greet you with an ever greater profusion of bloom. We have selected a few of the very best and offer them to you at a price that will allow you to have a perennial garden for only a few dollars cost.

Postpaid prices, each, 20c; 5 for 90c; 10 for \$1.70.

Achillea, The Pearl. The best white-flowered border plant. Resembles Pompon Chrysanthemum.

Aquilegia (Columbine). Flowers borne on slender spurred stems. Comes in various beautiful shades. Valuable for borders.

Hardy Chrysanthemum. Flowers very attractive and borne in large quantities during September and October. The red, yellow, pink and white bloom makes a gorgeous display.

Coreopsis. Rich golden yellow flowers in profusion all during the summer. Excellent for cut flowers. No more desirable perennial grown.

Delphinium (Larkspur). The long, showy spikes of Larkspur, attaining a height of 3 to 4 feet, are a beautiful sight from June to frost. Order by color, either the light turquoise blue or rich dark blue.

Gaillardia (Blanket Flower). One of the most gorgeous perennials grown, producing flowers that often measure three inches in diameter. Bright orange and yellow with circles of crimson, red and maroon. Blooms all summer and splendid for cut flowers.

Hibiscus. Plants grow to four or five feet in height and produce large, showy flowers of white and the various shades of pink and red.

Japanese Iris. This is the latest blooming Iris but by far the tallest growing and most beautiful. No other Iris can compare with it. Flowers often eight to ten inches across and of such shape and color as to attract the greatest attention. This class of Iris should be well cultivated to assure the greatest extent of bloom and beauty.

Hardy Phlox. These beautiful perennials can be used as borders, large groups in the lawn or as an edging for shrubbery. A continuous bloom can be had until frost by pinching back to remove the faded flowers. We have them in red, pink, salmon and white. Order by color.

Hardy Chrysanthemums.

Coreopsis.

Gaillardia.

Hardy Phlox.

Aquilegia—Columbine.

Gypsophila (Baby's Breath). This tiny white flower—a mist of feathery bloom—is largely used for mixing with sprays of high colored flowers and in this way gives a delightful effect.

Hollyhock. Known by everyone. With their long spikes of many colored flowers borne in profusion, no wonder Hollyhock has been called "King of the Garden." All of our varieties are double and come in red, pink, white and orange.

Delphiniums.

G'adiolus.

Knight's Beautiful Gladiolus

The varieties listed here are the very cream of all Gladiolus. Every desirable color is represented and every variety is a proven producer of the most gorgeous flowers imaginable. Send us your order for as many of these large, full flowering size bulbs as you can find room for and you will experience a new thrill from growing flowers.

Price, all varieties, 5c each; 50c per doz.; \$2.50 per 100.

Anna Eberius. Dark beautiful purple; a general favorite.

Flora. The best canary yellow, extra large flowers.

Le Marechal Foch. Beautiful light pink. Extra large flowers. One of the earliest.

Louise. Called "Queen of the Lavenders." Unusually beautiful, resembling an orchid.

Mrs. Frank Pendleton. A lovely flushed salmon-pink with rich maroon blotch in throat.

Peace. Beautiful large, pure white flowers with a touch of carmine markings in lower petals.

War. Magnificent dark, real blood red color. Flowers unusually large and plentiful.

Alice Tiplady. Real orange. Very fine flower with lasting qualities.

Chateau Thierry. Extra fine red with large, creamy blotch.

Independence. Coral pink. One of the finest for cut flowers.

Mrs. Francis King. A striking shade of pure scarlet or flame color. One of the most effective.

Maiden Blush. Apple blossom color. A beautiful "Glad" and a favorite everywhere.

1910 Rose. Extra fine, dark rose-pink; lower petals lined with white through center.

If Gladioli are desired by
parcel post, add

5c for 12 bulbs

8c for 25 bulbs

12c for 50 bulbs

to cover postage and packing.

Peonies

Everyone knows the gorgeous beauty of Peonies and no one should be without a garden of them, for it is the best loved spring flower. They can be grown in any soil with sunny exposure and for years to come their entrancing loveliness will be a delight to all beholding them. Peonies come in red, white and pink, and we selected one variety of each color that is the very best. It pays to buy the good ones.

Karl Rosenfield. A most striking velvety crimson Peony of the rose type. This is probably the best red Peony grown, usually selling for \$2.00 or more, and rarely as low as \$1.00. By a fortunate circumstance we are able to sell them at the very low price listed. Each, 60c; 3 for \$1.50.

Rose Fragrans. The most popular pink Peony grown. Large, double blossoms with delightful fragrance. Each, 30c each; 3 for 75c.

Couronne d'Or. The grandest of the whites, with large, compact blossoms—a beautiful thing. Each, 40c; 3 for \$1.00.

All Peonies have 3 to 5 eyes. No better can be had at any price.

(If Peonies are wanted by mail, add 5c each for postage).

Peony, Karl Rosenfield.

DETACH ORDER BLANK HERE

Read Carefully Before Making Out Order

ORDER EARLY. Do not delay placing your orders until you are ready to plant. The earlier orders are placed the better it is for you and for us. All orders are booked in rotation as received, therefore, it is to your advantage to get your order placed early before varieties you wish are gone.

HOW TO ORDER. Use the order sheet found in this catalog, being sure to write your name and address plainly, and fill out all blanks carefully with reference to where you want your plants shipped, whether you want them sent by express, freight or mail, and at what time.

COMPLAINTS. Complaints, if any, must be made within ten days after receipt of stock.

SHIPPING SEASON commences about March 15th and continues until about May 15th.

HOW WE SHIP. Express and parcel post are much the safer way. We guarantee express and parcel post shipments to reach destination in good condition. Raspberry, blackberry and other heavy plants can be shipped safely by freight early in the season. However, all freight shipments go at consignee's risk.

TERMS. Cash with order, or part cash when order is sent, the balance to be sent before shipment.

REMITTANCES. Send money by Check, Draft, Post Office Money Order, Express Money Order or Registered Mail. Currency sent in a letter without registering is at sender's risk.

A BARGAIN

Occasionally labels are misplaced on plants in field or packing house and we cannot be sure what variety they are. Some days we have more of certain varieties dug than we can ship on orders. All such stock we call BARGAIN PLANTS. These are plants from our very best varieties and will give excellent fruit at a considerable saving.

\$3.50 per Thousand

Copy These Rates for Future Reference

To Compute Amount Postage on Your Order

First ascertain the group in which you are located and then refer to list below which will tell you the amount of postage to send.

Group 1—Central and Northern Michigan, Southeast Wisconsin, Northeast Illinois, Central and Northern Indiana, Western Ohio.

Group 2—Balance of Wisconsin, Illinois, Indiana and Ohio.

Group 3—Minnesota, Iowa, Missouri, Arkansas, Kentucky, Tennessee, North Carolina, Virginia, West Virginia, Pennsylvania, New York.

Group 4—North Dakota, South Dakota, Nebraska, Colorado, Kansas, Oklahoma.

Group 5—Montana, Wyoming, Idaho, Utah, California.

Group 1—Add 10c for each 100 Strawberry or Asparagus plants.

Group 2—Add 14c for each 100 Strawberry or Asparagus plants.

Group 3—Add 21c for each 100 Strawberry or Asparagus plants.

Group 4—Add 28c for each 100 Strawberry or Asparagus plants.

Group 5—Add 35c for each 100 Strawberry or Asparagus plants.

25 Raspberry or Blackberry plants take the same postage as 100 Strawberry or Asparagus plants.

6 Shrubs, Roses or Grape vines take the same postage as 100 Strawberry or Asparagus plants.

100 Gladiolus bulbs take the same postage as 100 Strawberry or Asparagus plants.

KNIGHT'S PRICES FOR 1931

IMPORTANT NOTICE—All plants shipped by express go charges collect. If mail shipment is wished add postage as shown in table at bottom of page 22.

5% DISCOUNT FOR EARLY ORDERS

We allow a special discount of 5% from catalog rates, on all orders sent in before March 20th, accompanied by cash in full.
